

Project Group No:13

Topic: Event Management

• Introduction

A day of fun and merriment, Birthday Party holds a special aura as it comes once a year. It is also a day wherein one who is not a kid reflects upon the year gone by and ponders over plans and resolutions for the coming year. A leading birthday party organizer and birthday party planner, Exotic Events specialists in birthday party planning and execution with the requisite capability to make the right arrangements and putting forward the right theme for the birthday occasion. We recognize that birthday party differs from person to person and even from age to age of every person. And accordingly frame the party planning and implementation with out-of-the-box ideas and themes well within the budget. Our birthday party planners ensure the right moves for your birthday occasion like decoration, cake, balloons, flower arrangement, game themes and so on. By fusing together each and every element to perfection, they ensure that a colourful decorated birthday party is held that will surely thrill your guests and will make them remember it for long. In short, they will ensure that a birthday party is unique with a surprise element to it draped by festivity all around, enough to stay in memory for long. For Kids Birthday parties we can introduce fascinating themes and settings with creative kid games and programs that appeal to their senses instantly and gets them into the groove. If possible, we can also choose the right destination with eye-catching decoration that is kid-like all the way. Similarly for teens and grown-ups, we can schedule creative events like Dance party, different indoor and outdoor games, dramas, Face painting, Stage Performance and many more. We can also introduce return gift services that will add a special meaning to your event and create a very nice impression. In keeping with our status as a leading Birthday Party Organizers and Party Planners, we ensure that you get true money's worth that will take away all your worries. The entire goal is to make your birthday party a event beyond your imaginations, and something extraordinary that will be remembered for years. If you're thinking of organizing a birthday party, surprise or known one, feel free to talk to us in confidence, and we will ensure that the Birthday Party is celebrated in memorable style.

Birthday Party Organizer is a web application. The main objective of this web application is to provide required services for birthday planning at one platform.

- **Scope:**

Web-based Event Management System is used to create a dedicated website to manage and organize events. The accessibility of the system should facilitate communication between users, clients, and managers. It will allow clients to request events be made. It should then allow site managers to create an event that includes the host, type of event, time, place, cost, and staff list. End users should be able to sign up to attend or help staff the event. The core of the system will reside on a server connected to the internet and the primary interface for the system will be via an internet browser.

- **Modules**

1. Login module
2. Profile Management Module
3. Services Module
4. Package Module
5. Order Module
6. Payment Module

- **Features of the Project**

- **Customer**

1. Customer can make account
2. Customer can choose from existing package or make custom package
3. Custom can view his/her order details
4. Customer can give feedback
5. Customer can add/remove services in his/her order

- **Servicer Provider**

1. Service provider can update profile details like name, password change
2. Service provider can add/update/delete products and details,
3. Service provider can add products/services images
4. Service provider can view payments details

- **Admin**

1. Admin can update profile details like name, password change
2. Admin can add/update/delete products and details,
3. Admin can add products/services images
4. Admin view payments details

5. Admin can add/update/delete service providers
6. Admin can add/update/delete packages

- **Roles and Responsibilities**

- **Roles:**

- 1)Admin
- 2)Service Provider
- 3)Customer

- **Responsibilities:**

- **Admin:**

1. Manage the site
2. Forward user orders to service providers
3. Solve customer problems
4. Understanding requirements of Customer
5. Manage enquiry
6. Manage event
7. Manage services
8. Manage package

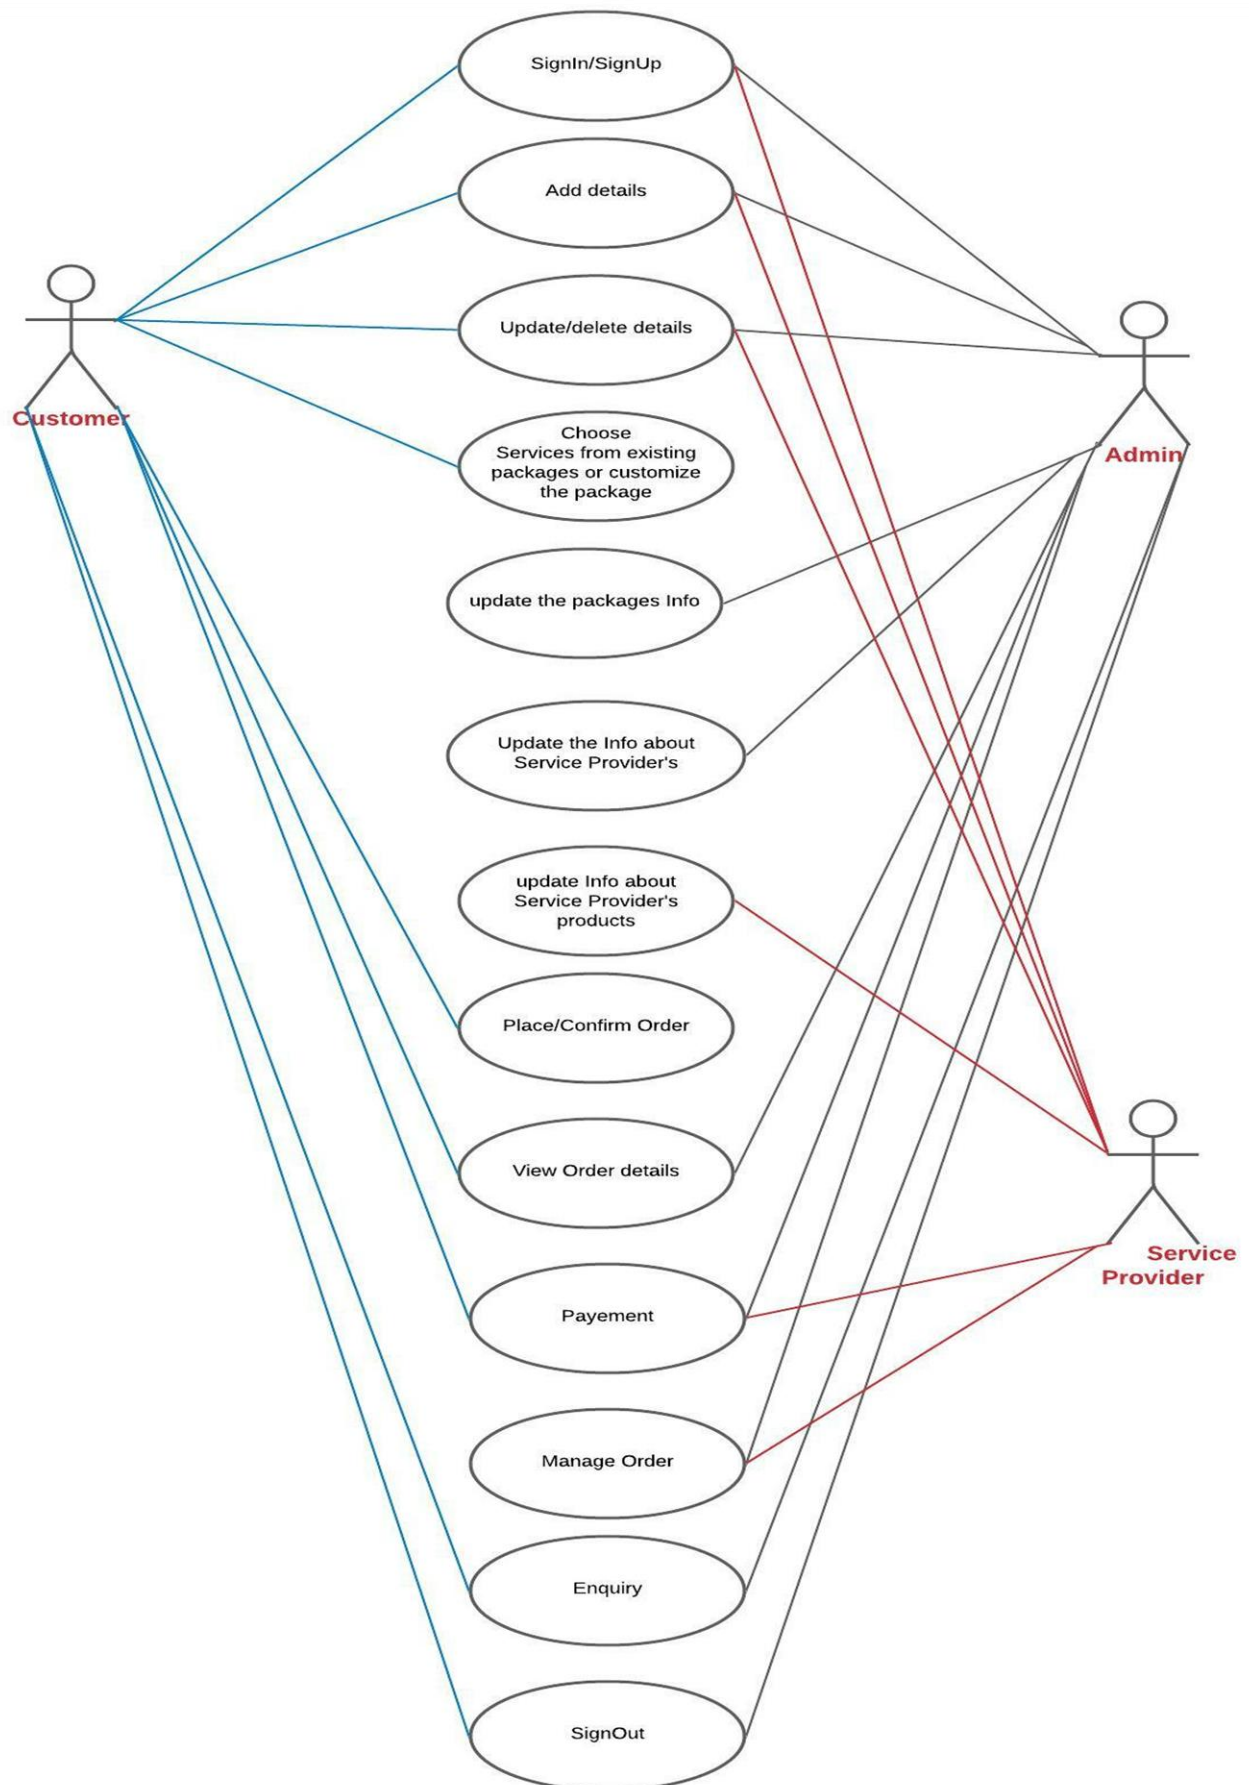

- **Service Provider**

1. Take requirements from admin
2. Provide services

- **Customer**

1. Place orders
2. Give feedback
3. Track Orders
4. Enquiry

- Use Case Diagram

- **Database Schema**

1.User Table

userid	username	password	user_role
primary key(auto) int	varchar(100)	varchar(100)	varchar(100)

2.Customer Table

cust_id	fname	mname	lname	mobno	email	addline1	city	zipcode
primary key(auto) int	varchar(100)	varchar(100)	varchar(100)	int	varchar(200)	varchar(600)	varchar(100)	int

3.Service Provider Table

servproid	fname	mname	lname	mobno	addressline1	city	zipcode
primary key(auto) int	varchar(100)	varchar(100)	varchar(100)	int	varchar(600)	varchar(100)	int

4.Admin table

admin_id(pk)	first_name	middle_name	last_name
primary key(auto) int	varchar(100)	varchar(100)	varchar(100)
